

Hello, I'm a Certified LeSS Trainer, one of 25 globally.

Are you involved in a complex software, firmware, or hardware development effort? Are you frustrated by poor value delivery, lack of creativity, unrealistic expectations, and the bureaucracy of the culture within a waterfall or SAFe structured product development organization?

If you want to better understand for yourself, and be able to express to others, how organizational design impacts the ability to create an adaptable organization you will benefit from my 3-Day Certified LeSS Practitioner course.

If you would like a Certified LeSS Practitioner course in your city, please fill out my interest survey.
